

**OWNER:** U.S. DEP'T. OF DEFENSE EDUCATION  
ACTIVITY—DDESS

**LOCATION:** FORT KNOX, KY

**BUDGET:** \$16.0 MILLION

**COMPLETION:** 2009

Fort Knox High School was constructed for the Domestic Dependent Elementary and Secondary Schools (DDESS). The building consists of two-story steel frame super structure combined with light-gauge steel framing, reinforced concrete slab-on-grade, suspended hollow-core slabs, and shallow foundations consisting of both column spread footings, continuous wall footings, and shear walls. CEI provided special inspections for this project and worked with the Structural Engineer of Record (SER) to resolve any concerns and site related issues, which resulted in a quality, final product. In addition, CEI has prepared monthly reports for the contractor and all associated parties and a final report for submittal to the state of KY for compliance.
