

OWNER: WESTPORT RD CHURCH OF CHRIST

LOCATION: LOUISVILLE, KY

BUDGET: \$3.2 MILLION

COMPLETION: SUMMER 2011

The sanctuary addition to the Westport Road Church of Christ is a 15,500 square foot addition to the existing church building. The addition is centered around a new sanctuary and flanked by offices, classrooms, kitchen area, and large lobby. A porte cochere for vehicle access and drop off was also constructed outside the lobby. The sanctuary and porte cochere were provided as pre-engineered metal buildings and the other office and classroom areas were constructed with structural light gauge walls and trusses. Cornerstone Engineering provided the design of all building foundations and light gauge framing. Cornerstone also worked closely with the metal building manufacturer during design and construction to assure the provided building met the needs of the client.
